

View & Manage Global Settings

Last Modified on 08.18.25

View Inherited Settings

You can view deployment processes that are inheriting a specific global setting.

To view inheritance for a setting:

1. On the Patching **Settings** page, click the Settings cog to the right of the environment.

Settings							
Environments							
View and manage your A and Intune service conne	Application Manager Settings for the cons in your environment.	e Configuration Manager	+ Add	Environment	Ċ		
Configuration	Environment 1	Туре	Deployment processes	Actions			
✓ Ready	ConfigMgr-Environment	E Configuration Manager	3	•			
 Not Ready (i) 	Intune-Environment	🕒 Intune	0	•••			

2. On the **General**, **Deployment Processes** or **Deployments** tab, click the View Inheritance icon beside a heading or an individual setting.

NOTE: You'll see a warning at the top of the tab if one or more settings has blocked inheritance.

3. In the Inheritance side panel that opens, view or search for the deployment processes that inherit the setting.

Inheritance

The following deployment processes are inheriting the Application Name Format setting.

2 deployment processes found	Q Search		
Deployment Process 1	Status	Actions
