

## Add an Environment

Last Modified on 11.21.25

In Right Click Tools Patching, you can add multiple Configuration Manager and/or Intune environments.

To add an environment:

1. On the Patching **Settings** page, click **Add Environment**.
2. On the **Service Connections** page that opens, click to [add a service connection](#).

With the service connection added, the new environment will appear on the **Settings** page with the Configuration showing as 'Not Ready'.

3. On the **Settings** page, hover over the information icon (located just to the right of the 'Not Ready' label) to view the fields that must be completed.

4. Click the Settings cog.

### Settings

#### Environments

View and manage your Application Manager Settings for the Configuration Manager and Intune service connections in your environment.

<div><input type="text" value="Search"/></div> <div><a href="#">+ Add Environment</a> </div>				
Configuration	Environment 	Type	Deployment processes	Actions
 Ready	ConfigMgr-Environment	 Configuration Manager	3	 
 Not Ready 	Intune-Environment	 Intune	0	 

5. On the **Environment Settings** page that opens, complete the required fields and save your changes.

Back on the **Settings** page, the environment will show as 'Ready' and can be used for deployment processes.
