

# Add an Environment

Last Modified on 03.25.25

Recast Software Version 5.7.2410.1403 introduces the ability to add multiple environments in Application Manager. Both Configuration Manager and Intune environments are supported.

To add an environment:

1. On the Application Manager **Settings** page, click **Add Environment**.
2. On the **Service Connections** page that opens, click to [add a service connection](#).

With the service connection added, the new environment will appear on the **Settings** page with the Configuration showing as 'Not Ready'.

3. Hover over the information icon to view the required fields that must be completed.
4. To complete the configuration, click the Settings cog.

## Settings

### Environments

View and manage your Application Manager Settings for the Configuration Manager and Intune service connections in your environment.

Configuration	Environment ↑	Type	Deployment processes	Actions
✓ Ready	ConfigMgr-Environment	Configuration Manager	3	
⊘ Not Ready ⓘ	Intune-Environment	Intune	0	

5. On the **Environment Settings** page that opens, complete the required fields and save your changes.

Back on the **Settings** page, the environment will show as 'Ready' and can be used for deployment processes.
