

Add an Environment

Last Modified on 08.18.25

In Right Click Tools Patching, you can add multiple Configuration Manager and/or Intune environments.

To add an environment:

1. On the Patching **Settings** page, click **Add Environment**.

2. On the **Service Connections** page that opens, click to add a service connection.

With the service connection added, the new environment will appear on the **Settings** page with the Configuration showing as 'Not Ready'.

3. On the **Settings** page, hover over the information icon (located just to the right of the 'Not Ready' label) to view the fields that must be completed.

4. Click the Settings cog.

Settings					
Environments					
View and manage your A and Intune service conner Q Search	pplication Manager Settings for the ctions in your environment.	e Configuration Manager	+ Add	Environment	Ċ
Configuration	Environment 1	Туре	Deployment processes	Actions	
✓ Ready	ConfigMgr-Environment	Configuration Manager	3	•	
() Not Ready (i)	Intune-Environment	😝 Intune	0	•	

5. On the **Environment Settings** page that opens, complete the required fields and save your changes.

Back on the Settings page, the environment will show as 'Ready' and can be used for deployment processes.
