

Test an Integration

Last Modified on 06.02.25

On the Application Manager **Settings** page, you can test whether a Configuration Manager or Intune integration is set up to function correctly.

The test checks the following:

- Service connection is working properly
- UNC path is accessible
- Required [proxy permissions](#) are in place

To test an integration:

1. On the **Settings** page, under **Actions**, click the ellipsis (...) to open the drop-down menu.
2. Click **Test Integration**.

Configuration	Environment ↑	Type	Deployment processes	Actions
✓ Ready	ConfigMgr-Environment	Configuration Manager	3	⚙️ ...
⚠️ Not Ready ⓘ	Intune-Environment	Intune	0	Sync Information Test Integration Edit Service Connection 🗑️ Delete Integration
