

# Right Click Tool Functionality by Configuration

Last Modified on 01.10.25

The browser extension offers many Right Click Tools for comanaged devices, as well as a limited set of actions that can be run on device sets managed exclusively via Intune. Expect the functionality available within different configurations to change as new browser extension features are released.

## Tools Available in Comanaged and/or Intune Environments

**NOTE:** Comanaged environments that include only Microsoft Entra joined devices require both Recast Management Server and Recast Agent.

	TOOL	ENTRA HYBRID JOINED DEVICES	ENTRA JOINED DEVICES
