Recast

Browser Extension Requirements & Recommendations

Last Modified on 11.18.25

Requirements and recommendations for installing and running the Enterprise Edition of Right Click Tools using the Right Click Tools Browser Extension:

- Version 5.10.2506 or later of the Right Click Tools Enterprise Edition installed on the device from which you will run Right Click Tools actions (required).
    - You can run single device actions using v5.8.2501 or later but multi-device actions require a minimum of v5.10.2506.
    - If you are installing Right Click Tools on a device where no Microsoft Configuration Manager console is present, you'll need to provide ConfigMgr site information during or after installation.
- Version 5.10.2506 or later of Recast Management Server installed (recommended)
    - Right Click Tools connected to Recast Management Server (recommended)
    - Recast Agent installed on the device where you want to run actions, with that device connected to the Recast Management Server (recommended)
- Right Click Tools browser extension added (required)
    - Right Click Tools for Intune in Edge Add-ons Store
    - Right Click Tools for Intune in Chrome Web Store
