

## Access Right Click Tools in Intune

Last Modified on 05.19.26

Once you've installed the browser extension for [Right Click Tools Enterprise](#) or [Right Click Tools Community](#), you can access the Recast actions included in your edition within the Intune Admin Center.

**NOTE:** The browser extension launches the Right Click Tools Console Extension as the user running the browser process. In a tiered account system, you must open the web browser as the elevated account for Right Click Tools to run with the required permissions.

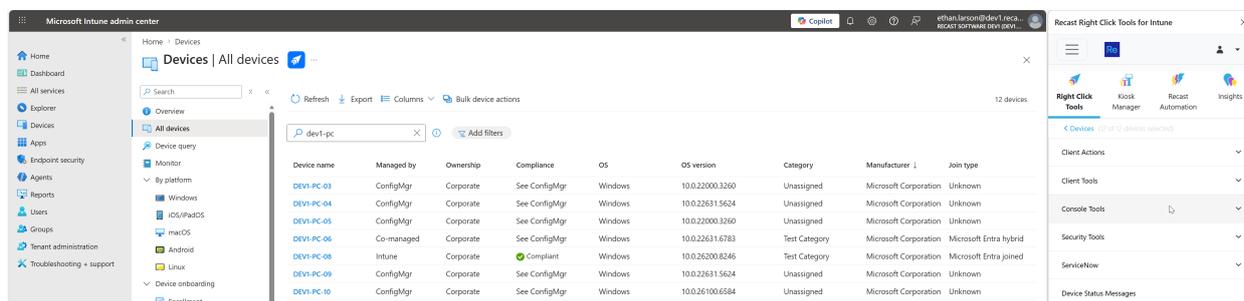

To learn about Recast's new Entra-focused actions, see [Intune-/Entra-Focused Console & Security Tools](#). For information on configuring existing Right Click Tools to work in an Entra ID-joined, Intune-only managed environment, see [Make Tools Work With Entra-Only Devices](#).

To open Right Click Tools menus within Intune:

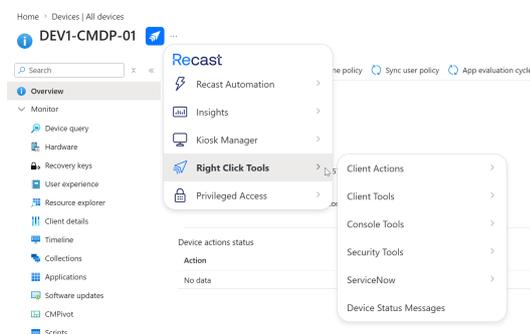

1. Log into [intune.microsoft.com](https://intune.microsoft.com).
2. Click the Recast Software icon to the right of a page name.

**TIP:** You can also open Right Click Tools by highlighting a full device name or IP address and right-clicking on it.

On multi-device pages, clicking the Recast icon will open the Recast side panel, where you can then multi-select devices. For feature requirements and details, see [Run Multi-Device Actions in Intune](#).

On an **individual device page**, or when Right Click Tools cannot connect to a Recast Management Server, clicking the Recast icon will open the Right Click Tools menus in the main window.

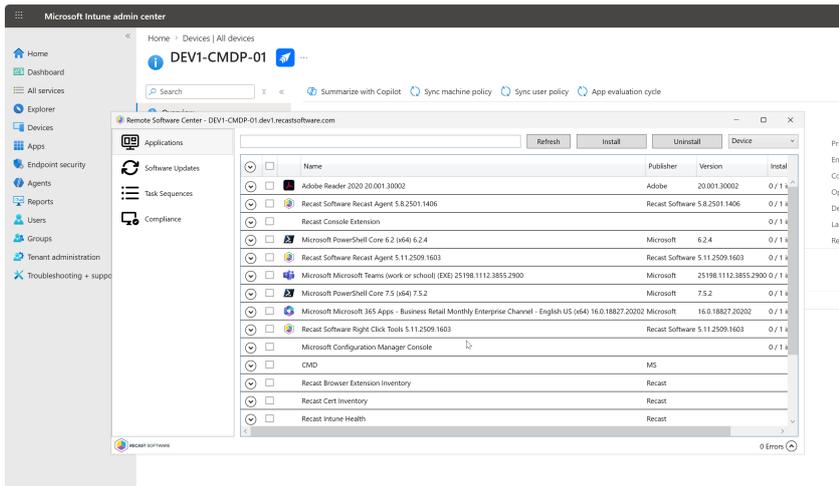

4. Navigate through Right Click Tools menus and select a tool.

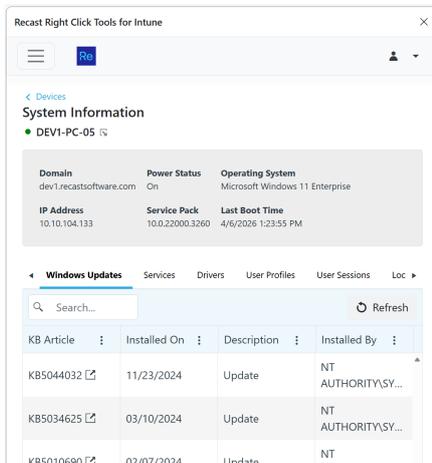

The first time you run a Recast action, you'll need to confirm that you want Intune to open the Recast.ConsoleExtension by clicking **Open** or enabling the **Always allow** option.

For most tools, the results window will appear over the Intune page.

# Recast

When running the [System Information](#) tool for a single device, results will appear in the Recast side panel.

**TROUBLESHOOTING:** If a Right Click Tools menu does not appear, right-click on the Recast or Extensions icon in the browser toolbar, choose **Manage extensions**, disable and re-enable the browser extension, and relaunch the browser.
