Recast

Right Click Tools Version 5.8.2501.1406

Last Modified on 2026-10-29

Release Date: January 15, 2025

Version 5.8.2501.1406 includes new features and bug fixes. Upgrade to this Recast Software release by downloading it from our updated Recast Portal. For instructions on updating to this version, see our articles on upgrading Right Click Tools, Endpoint Insights, Privilege Manager, and Application Manager.

Features

Introducing the Right Click Tools for Intune!

Recast Software Version 5.8.2501.1406 introduces the Right Click Tools browser extension. This add-on, which is currently available for Microsoft Edge, integrates seamlessly with the Right Click Tools Enterprise or Community Edition, enabling you to run familiar Right Click Tools from within other interfaces, such as the Microsoft Intune Admin Center.

To learn more:

- Install Browser Extension for Right Click Tools Enterprise Edition
- Install Browser Extension for Right Click Tools Community Edition
- Access Right Click Tools in Intune

Recast Portal Updates

When you sign into the Recast Portal, you'll notice some changes and additions:

- The login page is now titled 'Portal Login' rather than 'Customer Login'.
- Updated Recast Product and Component descriptions add detail and clarity.
- The Right Click Tools Community Edition is available for download.

Bug Fixes

Recast Management Server

Service Connections: Fixes a 'Call cancelled' error when creating or editing a service connection. (Customer-Reported Bug 13488)

Permissions: Fixes an error when attempting to add a user or user group name with more than 20 characters. (Customer-Reported Bug 46100)

Right Click Tools

Configuration Manager: Fixes an issue causing ConfigMgr crashes shortly after the console is closed. (Customer-Reported Bug 9526)

Fast Channel: Fixes an 'Access Denied' error when attempting to run actions over a Fast Channel route. (Customer-Reported Bug 14800)

KNOWN ISSUE: A small number of end users have reported a problem when initializing the Right Click Tools console extension. For steps to resolve this issue, see ConfigMgr Issues After Right Click Tools Launch.

Endpoint Insights

Recast

Reports

- **List of Computers by Replacement Category**: Fixes an issue causing the report to take more than 10 minutes to complete. (Customer-Reported Bug 67927)
- **Recast EI Report Viewer**: Adds missing device names that should populate automatically. (Customer-Reported Bug 64195)
- **Software Updates by Age**: Fixes a 'No Data Available' error when clicking on the number of required updates. (Customer-Reported Bug 64824)
- **Computer Replacement Costs**: Fixes a 'rsErrorReadingNextRow' error in non-English language environments. (Customer-Reported Bug 5594)
- **SQL Server Report Set**: Updates the Count of SQL Server Editions, List of Computers by SQL Server Edition, and SQL Server Details reports to use SQL 2022.
- **Computer Replacement Costs**: Fixes an issue where the dollar sign ($) is displayed as the currency symbol regardless of the currency selected.

Application Manager

Applications

- Fixes an issue where no application is selected after choosing an environment and clicking**Deploy** on the Applications page.
- Fixes an inaccurate count of total applications on the Applications page.
