 RECAST SOFTWARE

Install Browser Extension for Right Click Tools Community

Last Modified on 08.11.25

The Right Click Tools browser extension works with both the Enterprise and Community Editions of Right Click Tools. This installation workflow is intended to guide Community users adding browser extension functionality to a new or existing implementation of the Right Click Tools Community Edition.

Recommended workflow for installing the browser extension with Right Click Tools Community:

1. Make sure that the browser extension requirements are in place.

2. Download v5.8.2501 or later of the Right Click Tools Community Edition, plus the license file, from the Recast Portal.

3. Install Right Click Tools Community v5.8.2501 or later .

4. Add your licenses to the Configure Recast Console Extension application .

5. Add the Right Click Tools browser extension .

Once you've completed the installation steps, you'll be able to find your familiar Right Click Tools within Intune .

For a video walkthrough of this installation workflow, watch Right Click Tools for Intune: Install Walkthrough on our YouTube channel.
