Install Right Click Tools for Intune

Last Modified on 09.02.25

The Right Click Tools for Intune browser extension is an add-on available for Microsoft Edge and Google Chrome. The browser extension enables you to run Right Click Tools from within the Microsoft Intune Admin Center and other interfaces, such as ServiceNow. You can expect that actions will work in a similar way in Intune and Configuration Manager.

The browser extension currently supports many tools for Microsoft Entra hybrid joined devices, and a limited but expanding set of tools for Entra joined devices. For details, see [Right Click Tool Functionality by Configuration](#). Future releases will add to the number of actions that can be run on those devices. We welcome your input and feature requests in the [Recast Software Ideas Portal](#).
