RECAST SOFTWARE

RMS Database Migrations Not Applied

Last Modified on 02.28.25

Recast Management Server database migrations may fail if the SQL compatibility level is set a version earlier than SQL Server 2016.

To check or edit the compatibility Level for your RecastManagementServer database:

1. Navigate to the SQL Server Management Studio (SSMS) Object Explorer.

2. Expand the **Databases** section.

3. Right-click on the **RecastManagementServer** database and select **Properties**.

4. On the **Options** page, ensure that the database **Compatibility level** is set to at least 'SQL Server 2016'.

5. If you edit the compatibility level, click **OK** to save the change.
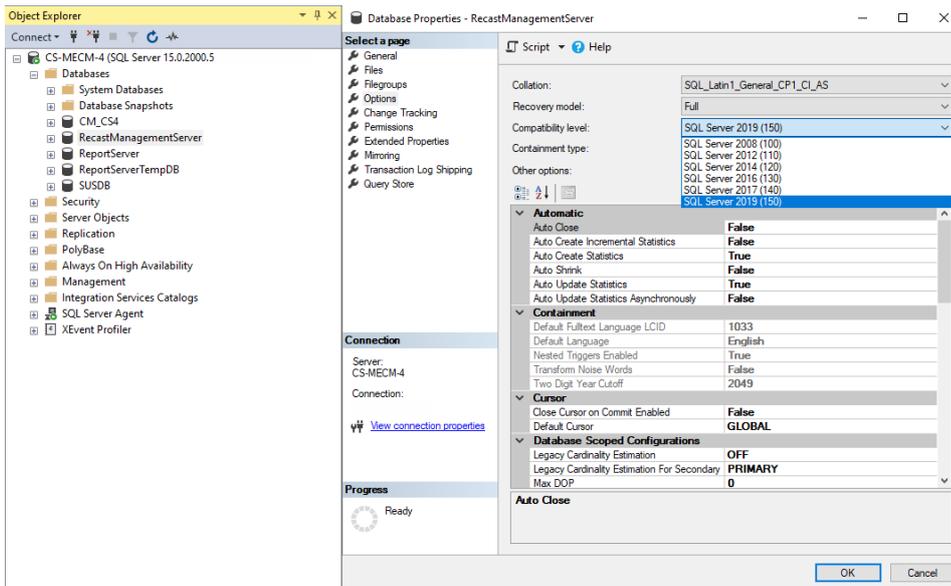

6. Recycle the RecastManagementServer app pool in IIS.
