Right Click Tools Patching

Last Modified on 2026-07-08

This network architecture diagram includes Recast components, as well as internal and external connections, that are required to implement Right Click Tools Patching as a self-hosted deployment.

Installation Notes

- The Recast Management Server can be installed on the primary Configuration Manager server or on another server.
- The Recast Proxy can be installed on the same server as RMS or on a separate server.
