Right Click Tools Version 5.9.2505.2003

Last Modified on 2026-10-29

Release Date: May 21, 2025

Version 5.9.2505.2003 includes new features, design improvements, and bug fixes. Upgrade to this Recast Software release by downloading it from the Recast Portal. Instructions for installing this version can be found in our articles on updating Right Click Tools, Endpoint Insights, Privilege Manager, and Application Manager.

PLEASE NOTE: We recommend that all Recast Software customers using Recast Agents or Privilege Manager skip this version and update their systems to **Version 5.9.2505.2307**.

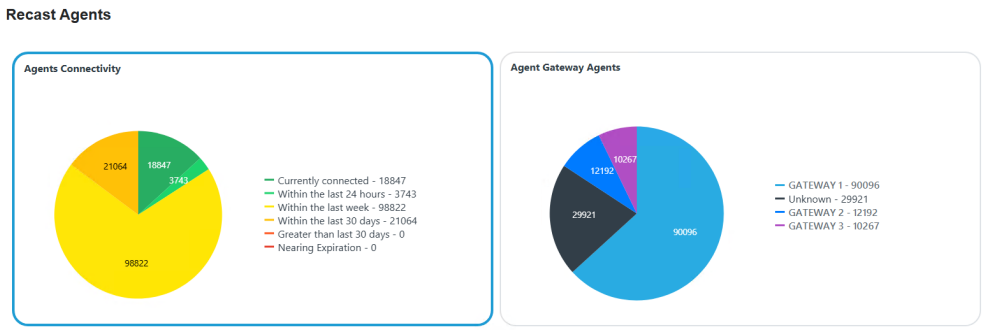

Features

This release includes new features developed during our Spring Hackathon, several of which deliver on requests submitted to our Ideas Portal.

Easier Agent Management, Re-enrollment & Cleanup

The new Agent Management web dashboard uncomplicates the task of overseeing communications between your agents and Recast Management Server. Find out when an agent last connected to an agent gateway, and the specific gateway to which an agent connects, to pinpoint connectivity issues.

To learn more, see Agent Management Dashboard.

You'll also find agent connection details on the Recast Agents page, where you'll now see faster page loading speeds when there are many agents.

Behind the scenes, we've added automatic agent re-enrollment, as well as an agent cleanup process that automatically removes inactive and duplicate agents, which means less time spent manually managing agents that fail to communicate with RMS.

New Right Click Tools

Retrieve All BitLocker Keys: Search all your configured BitLocker recovery key locations with a single Enterprise tool

Get User Profile Size: View user profile sizes so you can identify those worth removing to regain space

Disable or Enable Devices in Active Directory: A less-permanent alternative to deleting devices you may need to re-enable later

View Disk Space Details: See where a shortage of free disk space might cause software deployment or patching issues

Recast

Open Event Viewer: Access a remote Windows Event Viewer session straight from your Console Tools

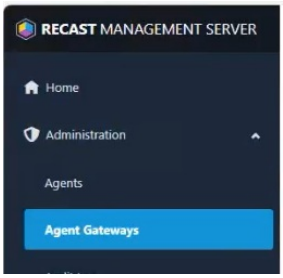

For a video walkthrough of new tools available in the Community Edition, see New Community Right Click Tools – May 2025 on our YouTube channel.

Recast Management Server Design Updates

You'll notice some visual design changes in RMS. We've adjusted the look of a number of user interface elements for quick recognition and improved usability.

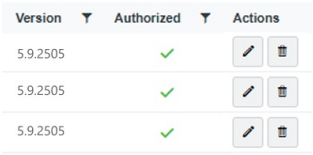

Navigation panel updates

- A new Recast Management Server wordmark aligns with our branding
- When you select a menu item:
  - The text is bolded for differentiation
  - The item is highlighted with a blue bar (rather than a grey one) to make the current selection more obvious at a glance
- Chevrons (^) are smaller, making them less conspicuous

RMS page updates

- Edit and Delete icons are now displayed in greyscale to reduce their prominence
- Header and footer rows now have a grey (rather than blue) background to allow strategic color use on buttons and symbols to stand out
- Column headings are bolded for improved legibility and differentiation from text within the table

Bug Fixes

Recast Management Server

Installation: Clicking 'Skip SQL Connection Test' during installation now stops all SQL connection attempts. (Customer-Reported Bug 68191)

Discovery Sync:

- Running a sync no longer produces a 'String or binary data would be truncated in table' error. (Customer-Reported Bug 72409)
- Running a sync for an active directory domain with a deeply nested hierarchy no longer produces a timeout error.

Task Scheduler: The Recast Management Server now communicates with the Task Scheduler Agent to determine whether cleanup tasks exist.

Right Click Tools

Installation: The Right Click Tools installer now accepts a Community license. (Customer-Reported Bug 72498)

Recast Builder: List input parameters now pass successfully to subsequent actions. (Customer-Reported Bug 14471)

Recast

Kiosk Manager: You can now apply a Kiosk Profile via a Recast Agent route without a 'KeyNotFoundException' error.

Application Manager

Integrations: Deleting an integration now properly deletes all configuration associated with the integration. There's also a new confirmation dialog when deleting an integration.
