Add an Environment

In Application Manager, you can add multiple Configuration Manager and/or Intune environments. This feature requires [Recast Software v5.7.2410.1403](#) or later.

To add an environment:

1. On the Application Manager **Settings** page, click **Add Environment**.
2. On the **Service Connections** page that opens, click to [add a service connection](#).

With the service connection added, the new environment will appear on the **Settings** page with the Configuration showing as 'Not Ready'.

3. Hover over the information icon to view the required fields that must be completed.
4. To complete the configuration, click the Settings cog.

Settings

Environments

View and manage your Application Manager Settings for the Configuration Manager and Intune service connections in your environment.

<div><input type="text" value="Search"/></div> <div>+ Add Environment </div>				
Configuration	Environment 	Type	Deployment processes	Actions
 Ready	ConfigMgr-Environment	 Configuration Manager	3	 
 Not Ready 	Intune-Environment	 Intune	0	 

5. On the **Environment Settings** page that opens, complete the required fields and save your changes.

Back on the **Settings** page, the environment will show as 'Ready' and can be used for deployment processes.

Test an Integration

On the Application Manager **Settings** page, you can test whether a Configuration Manager or Intune integration is set up

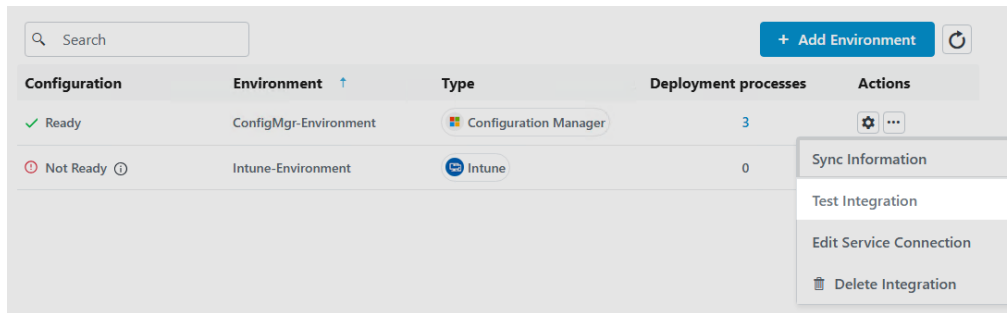

to function correctly.

The test checks the following:

- Service connection is working properly
- UNC path is accessible
- Required [proxy permissions](#) are in place

To test an integration:

1. On the **Settings** page, under **Actions**, click the ellipsis (...) to open the drop-down menu.
2. Click **Test Integration**.

Delete an Integration

Deleting an integration removes all configuration associated with the integration, as well as any deployment processes that are only linked to the environment(s) within that integration. This action cannot be undone.

To delete an integration:

1. On the **Settings** page, under **Actions**, click the ellipsis (...) to open the drop-down menu.
2. Click **Delete Integration** and confirm the deletion.
