

Sync Intune App and Compliance Policy

Last Modified on 01.19.26

The **Sync Intune App and Compliance Policy** tool forces an update to the Intune policy on selected devices. This tool can be run on single and multi-selected devices from within Configuration Manager or Intune. This action can be run over a Console Extension, Recast Proxy, or Recast Agent route.

This feature does not currently work in [Recast Builder](#).

Prerequisites

- [Recast Management Server](#) installed
- [Microsoft Intune Management Extension](#) installed
- [Service connection from your Recast Management Server to Entra ID \(Azure Active Directory\)](#)
- Minimum Recast Software version: 5.10.2508.1302
- Minimum Right Click Tools for Intune browser extension version: 2.0.0.6

Required Permissions

Plugin	Permissions
IntuneClient	SyncAppAndCompliance
MicrosoftGraph	SyncPolicyFromIntune

To run the tool:

1. Right-click on one or [more](#) devices.
 2. Select **Right Click Tools > Console Tools > Sync Intune App and Compliance Policy**.
 3. Confirm that you want to run the action, which will contact the target device(s) and trigger the policy synchronization request locally.
