 RECAST SOFTWARE

Sync Intune App and Compliance Policy

Last Modified on 09.03.25

The **Sync Intune App and Compliance Policy** tool forces an update to the Intune policy on selected devices. This tool can be run on single and multi-selected devices from within Configuration Manager, or on single devices in Intune (multi-device selection coming soon!). This action can be run over a Console Extension, Recast Proxy, or Recast Agent route.

This feature does not currently work in Recast Builder.

Prerequisites

- Recast Management Server installed

- Microsoft Intune Management Extension installed

- Service connection from your Recast Management Server to Entra ID (Azure Active Directory)

- Recast Software v5.10.2508.1302 or later

- Right Click Tools for Intune browser extension v2.0.0.6 or later

To run the tool:

1. Right-click on one or more devices.

2. Select **Right Click Tools** > **Console Tools** > **Sync Intune App and Compliance Policy** .

3. Confirm that you want to run the action, which will contact the target device(s) and trigger the policy synchronization request locally.
