

# View and Search the Application Catalog in Configuration Manager

Last Modified on 12.15.25

All Right Click Tools Enterprise customers and Community users can see and search the entire catalog of applications that can be deployed and updated using Right Click Tools Patching. Use the Catalog Search feature in your Configuration Manager console to explore the 4000+ applications in the catalog or to quickly check that a specific application is available to deploy and/or update with RCT Patching.

NOTES:

- You do not require a Patching license to view and search the full application catalog.
- This feature requires outbound access to the application catalog at <https://amprod02.recastsoftware.com>.
- This feature is available in Recast Software Version 5.11.2509.1603 or later.
- Each column is sortable and all catalog information is searchable.

To locate the Patching Catalog in Configuration Manager:

1. Navigate to **Assets and Compliance > Overview > Devices**.
2. Right-click on a device and select **Patching > Catalog Search**.

The Patching Catalog displays the following application information:

- Vendor
- Application name
- Last Update date
- Latest Available Version number
- Architecture
- Supported Integrations (Configuration Manager, Intune, WSUS)
- Language
- Latest Version ID
- Custom Application (True/False)
