

## What's New in Insights

Last Modified on 11.20.25

We're making it easier to surface the information you need with new Right Click Tools Insights features like the Warranty Information Dashboard.

**NOTE:** If you're curious about what's next for Insights and the whole Right Click Tools suite, check out the [Recast Product Roadmap](#). On the same page, you'll find the Feature Requests section where you can add and upvote product ideas.

### Recently delivered Right Click Tools Insights features:

**New Warranty Information Dashboard:** A new Insights dashboard in your Recast Management Server visualizes your device warranty landscape. This version includes a warranty expiration timeline as well as charts that display your devices according to warranty status and manufacturer. For a walkthrough of the data available in this initial iteration, see [View the Warranty Information Dashboard](#). Minimum Recast Software Version: 5.11.2509.1603

**Recast Device Warranty Plugin for Security Copilot:** Use the Device Warranty plugin in Microsoft Security Copilot to interact with your Recast Management Server and surface warranty information about devices. For instructions on setting up and using this functionality, see [Recast Device Warranty Plugin for Security Copilot](#). Minimum Recast Software Version: 5.10.2508.1302
