RECAST SOFTWARE

Recent Insights Features

Last Modified on 09.23.25

Recently delivered Right Click Tools Insights features:

New Warranty Information Dashboard: A new Insights dashboard in your Recast Management Server visualizes your device warranty landscape. This version includes a warranty expiration timeline as well as charts that display your devices according to warranty status and manufacturer. For a walkthrough of the data available in this initial iteration, see View the Warranty Information Dashboard. Minimum version: 5.11.2509.1603

Recast Device Warranty Plugin for Security Copilot: Use the Device Warranty plugin in Microsoft Security Copilot to interact with your Recast Management Server and surface warranty information about devices. For instructions on setting up and using this functionality, see Recast Device Warranty Plugin for Security Copilot. MInimum version: 5.10.2508.1302
