Recast

Remove Device(s) from Autopilot

Last Modified on 2026-09-23

Use the **Remove Device(s) from Autopilot** tool to remove one or more devices that are detected in Windows Autopilot. Currently, this tool can be run on single and multi-selected devices from within Configuration Manager, and on single devices from Intune. See also Register Device(s) in Autopilot.

Prerequisites

RCT Enterprise

- Recast Management Server installed with Recast Proxy
- Service connection from your Recast Management Server to Entra ID (Azure Active Directory)
- Minimum Recast Software Version: 5.11.2510.2904, Minimum browser extension version: 2.0.0.7, if accessing this functionality via Intune

RCT Community

- Minimum Right Click Tools Version: 5.12.2609.1102, Minimum browser extension version: 3.4.0.0.

Recast Permissions

Plugin	Permissions
ConfigMgrServer	GetSerialNumbersForResourceIds
Administration	ListAzureActiveDirectoryServiceConnections
MicrosoftGraph	RemoveDeviceFromAutopilot

Microsoft Permissions

Add the following Microsoft Graph API permission to the App registration for your Entra ID service connection.

Application Permission

- DeviceManagementServiceConfig.ReadWrite.All
- DeviceManagementManagedDevices.Read.All **or** DeviceManagementManagedDevices.ReadWrite.All

For more information, see our article on setting up Graph API permissions for Right Click Tools.

Run the Remove Device(s) from Autopilot tool

To run the tool:

1. Right-click on one or more devices.

2. Select **Right Click Tools** > **Console Tools** > **Remove Device(s) from Autopilot**.

3. Confirm the deletion.
