

## Application Revision History

Last Modified on 2026-05-28

The **Application Revision History** tool lets you view previous versions of an application.

To run the tool:

1. In your Configuration Manager console, navigate to **Software Library > Overview > Application Management > Applications**.
3. Right-click on an application, then click **Right Click Tools > Application Revision History**.

### Permissions

Plugin	Permissions
ConfigMgrServer	GetApplicationRevisions
LocalActions	ApplicationRevisionHistory
