

Graph API Permissions for Patching

Last Modified on 11.25.25

Set up the following Application permissions in the Graph API to access all Right Click Tools Patching features:

Application permissions

- DeviceManagementApps.ReadWrite.All
- GroupMember.Read.All
- DeviceManagementConfiguration.Read.All – required to [test an integration](#)
- Device.Read.All – required to [test the Azure Active Directory \(Entra ID\) service connection](#)

For instructions, see [Add API Permissions for Right Click Tools Patching](#).

For the full list of Graph API permissions required for features in the Right Click Tools suite, see [API Permissions by Product/Add-On](#).
