

Graph API Permissions for Patching

Last Modified on 11.24.25

Set up the following Application and Delegated permissions in the Graph API to access all Right Click Tools Patching features:

Application permissions

- DeviceManagementApps.ReadWrite.All
- DeviceManagementConfiguration.Read.All
- GroupMember.Read.All
- Device.Read.All

Delegated Permissions

• User.Read

For instructions, see Set Up Intune for Patching

For the full list of Graph API permissions required for features in the Right Click Tools suite, see API Permissions by Product/Add-On.
