Set Autopilot Group Tag

Last Modified on 04.14.26

Use the **Set Autopilot Group Tags** tool to add or edit tags for one or more devices that are detected in Windows Autopilot.

Prerequisites

- Recast Management Server installed with Recast Proxy
- Service connection from your Recast Management Server to Entra ID (Azure Active Directory)
- Minimum Recast Software Version: 5.11.2512.1807
- Minimum browser extension version: 2.0.0.8, if accessing this functionality via Intune

Recast Permissions

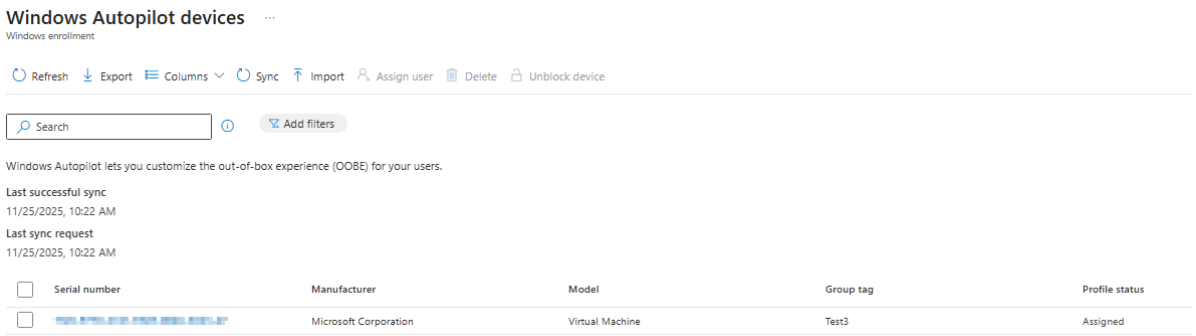
Plugin	Permissions
Administration	ListAzureActiveDirectoryServiceConnections
ConfigMgrServer	GetSerialNumbersForResourceIds
MicrosoftGraph	UpdateGroupTagInAutopilot

To run the tool:

1. Right-click on one or more devices.

2. Select **Right Click Tools** > **Console Tools** > **Add/Edit Group Tags in Autopilot**.

3. Add group tags or edit existing tags.

4. Click **Update** and confirm your changes.


You'll see a Complete! success message in Right Click Tools and your group tags will appear in the list of Windows Autopilot devices in the Intune admin center.
