

What's New in Privileged Access

Last Modified on 05.20.26

We're developing new Privileged Access features in 2026:

Allow Self-Service Only on Users' Primary Devices: You can now restrict self-service rules to just a user's primary devices. This functionality works for on-premises Active Directory joined devices and Entra joined devices. See [Limit Self-Service to Primary Devices](#). Minimum Recast Software Version: 5.11.2601.1504
