Recast

What's New in Privileged Access

Last Modified on 01.21.26

We're developing new Privileged Access features in 2026:

Allow Self-Service Only on Users' Primary Devices: You can now restrict self-service rules to just a user's primary devices. This functionality works for on-premises Active Directory joined devices and Entra joined devices. See Limit Self-Service to Primary Devices. Minimum Recast Software Version: 5.11.2601.1504

> Curious about what's next for Privileged Access and the whole Right Click Tools suite?
