

# Monitor Your Right Click Tools Infrastructure

Last Modified on 02.24.26

To ensure the ongoing health of your Right Click Tools Enterprise infrastructure — including your Recast Management Server, Recast Proxy, Recast Agent Gateway, and Recast Agents — we recommend monitoring the following components at regular intervals:

- Server Operating Systems
  - SQL Server and Recast Management Server Databases
  - IIS: Check the IIS service for availability and responsiveness, check the RMS-related sites and application pools
    - Recast Management Server
    - Recast Agent Gateway
  - Recast Proxy: Monitor the Windows 'Recast Proxy Service'
  - Connectivity:
    - Check connection of Recast Agents to the Recast Management Server and Recast Agent Gateway(s)
    - Check connection of Recast Agent Gateway(s) and Recast Proxy to Recast Management Server
-
