Register Device(s) in Autopilot	5.11.2601	RMS, Recast Proxy – for RCT Enterprise only
Set Autopilot Group Tag	5.11.2512 5.13.2610 for Community	RMS, Recast Proxy – for RCT Enterprise only
Remove Device(s) from Autopilot	5.11.2510 5.13.2610 for Community	RMS, Recast Proxy – for RCT Enterprise only
Sync Intune Policy	5.10.2508	RMS
Delete Device(s) from Azure (Entra)	5.10.2508 5.13.2610 for Community	RMS, Recast Proxy – for RCT Enterprise only
Delete Device(s) from Azure (Intune)	5.10.2507 5.13.2610 for Community	RMS, Recast Proxy – for RCT Enterprise only
Entra ID Security Groups	5.10.2507 5.12.2609 for Community	RMS, Recast Proxy – for RCT Enterprise only

> **Not sure which browser extension version you're running?**
>
> You can check the browser extension version by clicking the Recast icon in your toolbar. Alternatively, click the Extensions icon (the puzzle piece) located in your toolbar and select Recast Right Click Tools for Intune to see details.
>
> The browser extension updates automatically (typically within 24hrs) once a new version is approved for the

Recast

Edge Add-ons Store or the Chrome Web Store.

Make Tools Work With Entra-Only Devices

Many classic Right Click Tools are proven to run actions on Entra-Joined, Intune-only managed devices connected to a Recast Management Server only via Recast Agents.

Our testing was done with the following requirements in place:

- Right Click Tools installed on a computer running the Intune Admin Center
- Recast Management Server installed in the environment
- Right Click Tools for Intune browser extension installed on the device running the Intune Admin Center
- Recast Agents installed on devices where you want to run actions, and those devices are connected to the Recast Management Server

> **Having problems running some Console Tools on Entra-joined devices?**
>
> Some Console Tools, like Connect to C$, Manage Computer, Interactive Command Prompt, and Interactive PowerShell Prompt, will only work correctly once you configure native Windows tools like File Explorer, Registry Editor, Remote Desktop, and Remote WMI to connect remotely between Entra-only devices.
>
> For instructions, see these blog posts by Fabian Rodriguez:
> Set up and Enable File Sharing for Entra-Joined Devices
> Connect Entra-Joined Devices to Remote Desktop Using Entra ID Credentials
> Unlocking Remote WMI for Entra Devices in Windows 11 25H2
>
> To better understand PKU2U (Public Key User-to-User) authentication, see this blog post by Scott Erickson:
