Application Workspace Server System Requirements

Last Modified on 2026-10-05

The following requirements are minimal. We recommend using monitoring to check if they are sufficient and scale up when needed.

Item	Requirements
CPU	Single core or more (of a modern CPU)
RAM	At least 6 GB
Disk space	At least 500 MB for uploaded files
Windows operating system	Windows Server 2022 Windows Server 2019
.NET Framework	4.8 or higher
Database	Microsoft SQL Server 2022 (including Express) Microsoft Azure SQL Database Google Cloud SQL for SQL Server

Azure SQL Database Sizing

Right database sizing ensures optimal performance with Application Workspace. Use the SQL sizing information as a guide to choosing an initial amount of database transaction units (DTU) for Azure SQL, based on the number of users.

Users	Service tier	DTU
up to 200	Standard	10
200 – 1000	Standard	20
1000 – 10000	Standard	50
10000 – 20000	Standard	100
20000 – 35000	Standard	200
35000 – 60000	Standard	400
60000 – 75000	Standard	800
75000 – 100000	Premium	1000

NOTE: This table assumes that the Agent and/or Workspace refresh interval is set to the 30-minute default.

SQL Server Native Client
If you choose to use an Azure SQL database and you want to configure it with an Azure account, you need to install the SQL Server Native Client locally for this authentication method to work.
See Installing SQL Server Native Client and Configure and manage Microsoft Entra authentication with Azure SQL.
