

First Application Workspace Login

Last Modified on 2026-06-16

After installing the server, you can log in to the workspace through your browser on the virtual host you configured. Before you proceed, make sure that *license.liquit.com* is accessible.

1. In the login screen that is displayed, insert the default username 'LOCAL\Admin' and leave the password field empty.

2. After a successful login, the **Activate License** dialog box is displayed. Enter a valid license key.

Activate license

License state
None

Virtual host

License key *

Confirm

3. Go to User Menu > Change password

| | |
|------------------------|--|
| User Portal | |
| Change password | |
| Download Agent | |
| Introduction | |
| About | |
| Documentation | |
| Log out | |

4. In the dialog that opens, in the **Current password** field, enter a blank space.
5. In the following fields enter and confirm your new password, by complying with the password policy.

Change password ✕

Name
Administrator

Current password *

Password policy

- At least 8 characters long
- At least 1 letter
- At least 1 number
- At least 1 special character

New password *

Confirm password *

Confirm **Cancel**

6. Click **Confirm** after you finish.

 Recommendation
We strongly recommend [changing the password](#) for the `LOCAL\Admin` account after first login because leaving a blank password for this account after installation is a security risk, even when hiding the LOCAL Identity Source.
