

# Recast

## First Application Workspace Login

Last Modified on 2026-06-19

After installing the server, you can log into the workspace via your browser on the virtual host you configured. We then recommend that you update your Application Workspace password.

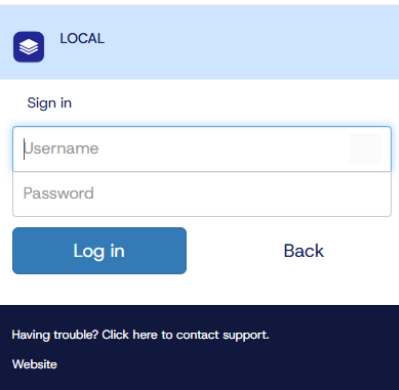

Make sure [license.liquit.com](https://license.liquit.com) is accessible before proceeding.

## Log Into Your Workspace

To log into your workspace the first time:

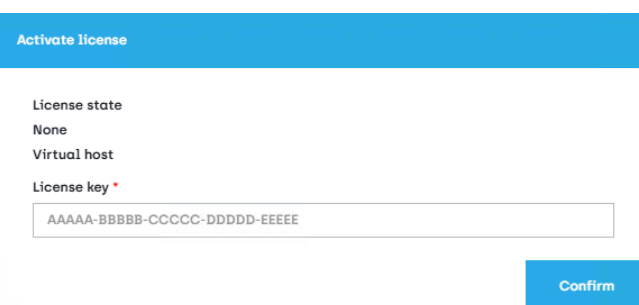

1. On the login screen, select LOCAL and enter the default username 'LOCAL\Admin'. Leave the password field empty.

### Recast

The login interface features a blue header with the Recast logo and 'LOCAL' text. Below the header is a 'Sign in' section with two input fields: 'Username' and 'Password'. A blue 'Log in' button is positioned to the left of a 'Back' link. At the bottom, a dark blue box contains the text 'Having trouble? Click here to contact support.' and a 'Website' link.

2. In the **Activate License** window, enter a valid license key and click **Confirm**.

The 'Activate license' window has a blue header. It displays the following information: 'License state: None', 'Virtual host', and 'License key \*'. The license key field contains the placeholder text 'AAAAA-BBBBBB-CCCCCC-DDDDD-EEEE'. A blue 'Confirm' button is located at the bottom right.

## Update Your Password

We strongly recommend changing the password for the `LOCAL\Admin` account after the first login. Leaving a blank password for this account after installation is a security risk, even when hiding the LOCAL Identity Source.

To change your Application Workspace password:

1. In the Application Workspace interface, open the User Menu (located in the upper right corner) and select **Change password**.
2. In the window that opens, in the **Current password** field, enter a blank space.

3. Enter and confirm your new password.
