

URL Parameters

Last Modified on 04.16.26

The URL parameters described in this article can be used to configure the look and feel of Application Workspace. You can combine multiple parameters within a URL. For example `sso` with `embed` and `background`, all enabled: `https://workspace.recastsoftware.com/?sso=1&embed=1&background=1`

Case-sensitive

All the parameters listed below are case-sensitive.

Where applicable, the 0 value means disabled and 1 means enabled.

Option	Default value	Description
sso	0	Enable or disable Single sign-on.
embed	0	When enabled, Application Workspace will display a more simple interface for iframes. The Side Menu and tabs (Workspace , Contacts , Catalog , Manage) are hidden. Only the toolbar without the Side Menu toggler is displayed.
text-color		Set the color of text for app icons in the Workspace tab. The values have to be hexadecimal without the # prefix, e.g.: <code>https://workspace.recastsoftware.com/?embed=1&text-color=000000</code>
text-shadow	0	Enable or disable the text shadow for app icons in the Workspace tab.
background	0	Control user background image. If enabled, in order to work, you must also enable the <code>embed</code> option.
sidemenu	[empty]	Display only a part of the Side Menu: <ul style="list-style-type: none">• default (show all parts)• filters• tags• teams
contextmenu	1	If no value is given, then the whole Side Menu will be hidden. In order to work, you must also enable the <code>embed</code> option.
identitySource		When enabled, the context menu is available across Application Workspace Launcher. Set as default a specific identity source. You can also enable the <code>SSO</code> option to trigger SSO for the identity source you specify, when multiple ones are visible.
page		Display a specific page when the user logs in. The available options are: <ul style="list-style-type: none">• catalog• manage• contacts• userportal• package
tiles	0	The package parameter can be extended by adding a package ID as follows: <code>https://workspace.recastsoftware.com/?page=package&id=packageID</code> When enabled, Application Workspace Launcher uses the tile-themed skin.
