Recast

# Users

Last Modified on 2026-08-21

The **Users** screen displays all the existing users within the Application Workspace Satellite Server and allows you to manage them or create new ones.

To edit or disable a user, select it and then click **View** in the table toolbar.

## Create user dialog box

The following basic options are displayed:

**Username** – The name used to authenticate the user.
**Password** – The password used to authenticate the user.
**Display name** – A friendly name used to identify the user.
