

## Users

Last Modified on 04.16.26

The **Users** screen displays all the existing users within the Application Workspace Satellite Server and allows you to manage them or create new ones.

To edit or disable a user, select it and then click  **View** in the table toolbar.

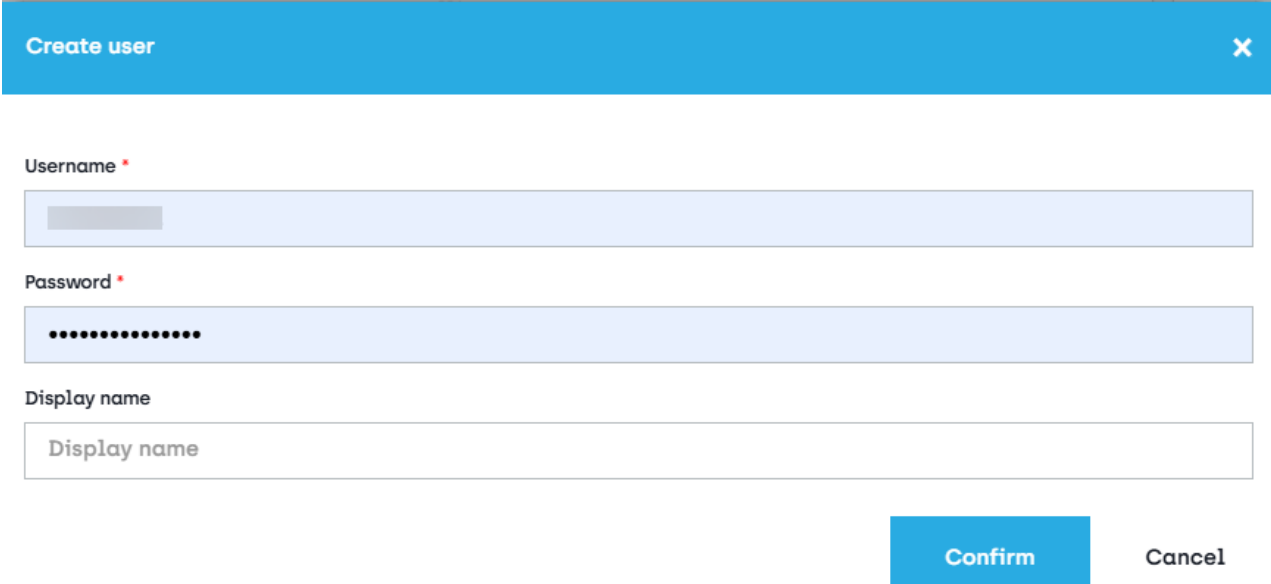

## Create user dialog box

The following basic options are displayed:

**Username** – The name used to authenticate the user.

**Password** – The password used to authenticate the user.

**Display name** – A friendly name used to identify the user.

**Create user** ✕

**Username \***

  
**Password \***  
**Display name**

**Confirm** **Cancel**
