

HTTP header exists

Last Modified on 04.16.26

Use the *HTTP header exists* filter to create a rule based on the existence (or absence) of a named HTTP header. For example, when a known proxy sets a unique header and you want to filter based on it.

General

Type *HTTP header exists*
Name Name of header
Exists *Yes, No*

Agent

It is available on devices with or without an Agent running.
