

Platform

Last Modified on 04.16.26

Use the *Platform filter* to check if a specific operating system is available on the device of the end-user. Based on the matched value, you can either include or exclude devices. This allows you to make your package or deployment available to only certain platforms.

General

Type *Platform filter*

- *Windows*
- *macOS*
- *Linux*

Value

- *Android*
- *iOS*
- *Windows Phone*
- *Unknown* – The platform is not detected or recognized.

Matches

- *Yes* the value matches the selected operating system.
- *No* the value does not match the selected operating system.

Agent

It is available on devices with or without an Agent running.

Supported platforms
