

Copy directory

Last Modified on 04.16.26

The *Copy directory* action allows you to copy entire directories using a path or UNC path as a source.

General

Type *Copy directory*

Name Actions are easier to comprehend and manage over time when they have a suitable name that accurately expresses what they do.

Source The path to the directory source.

Destination The path to the destination directory.

Advanced

Context The level at which the action is executed, *User* or *Device*.

The following options are available:

- Copy Policy**
- *Copy all the files, overwrite existing files*
 - *Copy all the files, only overwrite older files*
 - *Copy all the files, only overwrite changed files*
 - *Only copy files that exist at the destination*
 - *Only copy files that doesn't exist at the destination*

Filters

Here you can define conditions which determine if the action will be executed. For more information, see [Filters](#).

Agent

It requires the Agent to be running.
