

Create directory

Last Modified on 04.16.26

The *Create directory* action allows you to create a directory during the action sequences in a package.

General

Type *Create directory*

Name Actions are easier to comprehend and manage over time when they have a suitable name that accurately expresses what they do.

Path The path to directory to be created.

Advanced

Context The level at which the action is executed, *User* or *Device*.

Filters

Here you can define conditions which determine if the action will be executed. For more information, see [Filters](#).

Agent

It requires the Agent to be running.
