

Create Shortcut

Last Modified on 04.16.26

The *Create Shortcut* action allows you to create a shortcut on devices.

General

Type *Create Shortcut*

Name Actions are easier to comprehend and manage over time when they have a suitable name that accurately expresses what they do.

Path The path to the shortcut to be created.

Target The path to which the shortcut points.

Description The description of the shortcut.

Directory The working directory used when starting the target.

Arguments The arguments used when starting the target.

Advanced

Context The level at which the action is executed, *User* or *Device*.

Filters

Here you can define conditions which determine if the action will be executed. For more information, see [Filters](#).

Agent

It requires the Agent to be running.
