

Delete file(s)

Last Modified on 04.16.26

The *Delete file(s)* action allows you to delete one or multiple files at once, using a path or UNC path as a source.

General

Type *Delete file(s)*

Name Actions are easier to comprehend and manage over time when they have a suitable name that accurately expresses what they do.

Path The path to the file.

Advanced

Context The level at which the action is executed, *User* or *Device*.

Filters

Here you can define conditions which determine if the action will be executed. For more information, see [Filters](#).

Agent

It requires the Agent to be running.
