

Distribute package

Last Modified on 04.16.26

The *Distribute package* action allows you to distribute a package through actions of another package. This could be useful when you want to install a dependency for example.

General

Type *Distribute package*

Name Actions are easier to comprehend and manage over time when they have a suitable name that accurately expresses what they do.

Package Package to distribute.

Filters

Here you can define conditions which determine if the action will be executed. For more information, see [Filters](#).

Agent

It can be executed on the server (limited functionality) and therefore does not require the agent to function.

Supported platforms
