

Install font

Last Modified on 04.16.26

The *Install font* action allows you to install a font and make it available on devices.

General

Type *Install font*

Name Actions are easier to comprehend and manage over time when they have a suitable name that accurately expresses what they do.

The path to the font you want to install. The following font types are supported:

- File**
- True type front (.ttf)
 - Open type font (.otf)

Advanced

Context The level at which the action is executed *User, Device or Elevated user*. For elevated user, the action will be executed under the current user, but it's granted temporary permission to modify the local system.

The following options are available:

- Copy Policy**
- *Copy all the files, overwrite existing files*
 - *Copy all the files, only overwrite older files*
 - *Copy all the files, only overwrite changed files*
 - *Only copy files that exist at the destination*
 - *Only copy files that doesn't exist at the destination*

Filters

Here you can define conditions which determine if the action will be executed. For more information, see [Filters](#).

Agent

It requires the Agent to be running.
