

## Install uploaded directory

Last Modified on 04.16.26

The *Install uploaded directory* action allows you to upload a directory to the Content Store and have that directory be placed on devices in the destination specified.

### General

**Type** Install uploaded directory

**Name** Actions are easier to comprehend and manage over time when they have a suitable name that accurately expresses what they do.

**Path** Select the directory to upload.

**Destination** The destination path must be a directory.

### Advanced

**Context** The level at which the action is executed, *User* or *Device*.

**Fetch content on demand** If this option is selected, the content is downloaded only when the action is being executed; the content is not prefetched at the distribution stage.

### Filters

Here you can define conditions which determine if the action will be executed. For more information, see [Filters](#).

#### Agent

It requires the Agent to be running.

## Supported platforms

### Platform Supported

Web No

Windows Yes

macOS Yes
