

## Modify membership

Last Modified on 04.16.26

The *Modify membership* action allows you to add or remove the currently logged-in users from a specified identity source group. LDAP and Microsoft Entra ID (Azure AD) identity sources are supported.

For this action to be executed, you must configure the identity source of the users to allow group membership modifications.

Also the action allows you to add or remove the currently logged-in users from a static or dynamic user collection.

### General

**Type** *Modify membership*

**Name** Actions are easier to comprehend and manage over time when they have a suitable name that accurately expresses what they do.

**Group** Select the group to be modified.

**Operation** Add or remove logged-in users from the selected Identity Source group.

### Filters

Here you can define conditions which determine if the action will be executed. For more information, see [Filters](#).

#### Agent

It can be executed on the server (limited functionality) and therefore does not require the agent to function.

## Supported platforms

### Platform Supported

Web Yes

Windows Yes

macOS Yes
