

Refresh agent

Last Modified on 04.16.26

The *Refresh agent* action allows you to perform a refresh of the Agent from devices.

General

Type *Refresh agent*

Name Actions are easier to comprehend and manage over time when they have a suitable name that accurately expresses what they do.

- Type**
- *Local refresh* – refreshes only package filters.
 - *Online refresh* – performs a full refresh of the agent.

Trigger If this option is selected, a refresh event is triggered when refresh is finished, so that packages that are configured to launch on a refresh event are started.

Advanced

Context The level at which the action is executed, *User* or *Device*.

Filters

Here you can define conditions which determine if the action will be executed. For more information, see [Filters](#).

Agent

It requires the Agent to be running.
