

Shutdown

Last Modified on 04.16.26

The *Shutdown* action allows you to shutdown devices. If this action is used during deployment, the deployment will continue with the next action or package after startup.

General

Type *Shutdown*

Name Actions are easier to comprehend and manage over time when they have a suitable name that accurately expresses what they do.

Timeout The time in seconds to wait before a shutdown.

Filters

Here you can define conditions which determine if the action will be executed. For more information, see [Filters](#).

Agent

It requires the Agent to be running.
