Recast

Uninstall Mac App

Last Modified on 2026-09-24

The *Uninstall Mac App* action allows you to remove a Mac App from the current users or all users on devices.

General	
Type	*Uninstall Mac App*
Name	Give actions descriptive names that accurately convey what they do.
Bundle Name	The name of the bundle, e.g. the part in the directory name before ".app". For example, for the Application Workspace Agent for Mac ("Liquit.app"), it will be "Recast".
Bundle identifier	Optional, when provided the agent will try to find remains of the application also by bundle identifier next to the bundle name. The bundle identifier as specified in the Info.plist under the key "CFBundleIdentifier". For example, for the Application Workspace Agent for Mac, it will be "com.liquit.Agent".

Advanced	
Context	The level at which the action is executed, *User* or *Device*.
Additional bundle names	A comma separated list of additional bundle names that need to be looked for while removing the application.
Additional bundle identifiers	A comma separated list of additional bundle identifiers that need to be looked for while removing the application.

Filters
Define conditions under which the action is executed. For more information, see Filters.

Agent
It requires the Agent to be running.
