

Uploaded RDP file

Last Modified on 04.16.26

The *Uploaded RDP file* action allows you to upload an RDP file to the Content Store and run the file on devices from the content repository.

General

Type *Uploaded RDP file*

Name Actions are easier to comprehend and manage over time when they have a suitable name that accurately expresses what they do.

File Select the RDP file.

Advanced

Network Credentials The network credentials from the credential store, which will be used to access the specified file on a network location. The option is available only for Windows.

Try Remote Desktop Client If this option is selected, Liquit will try to start the Remote Desktop Client app instead of the default Remote Desktop Connection app.

Fetch content on demand If this option is selected, the content is downloaded only when the action is being executed; the content is not prefetched at the distribution stage.

Filters

Here you can define conditions which determine if the action will be executed. For more information, see [Filters](#).

Agent

It requires the Agent to be running.
Limited support when no Agent is present.
