

## Agent offline mode

Last Modified on 2026-09-24

Use *Agent offline mode* to filter based on the offline mode of the Agent running on devices. This is available only when using the Application Workspace Launcher.

| General |                           |
|---------|---------------------------|
| Type    | <i>Agent offline mode</i> |
| Enabled | <i>Yes, No</i>            |

**Agent**  
It requires the Agent to be running.

## Supported platforms

| Platform | Supported |
|----------|-----------|
| Web      | No        |
| Windows  | Yes       |
| macOS    | Yes       |
